THE IDITAROD NATIONAL HISTORIC TRAIL

TRAVERSING 2,300 MILES across Southwestern Alaska, the Iditarod Trail was designated a United States National Historic Trail in 1978. Prior to this, it was instrumental to the development of Alaska as a United States Territory during the Gold Rush, and was used in the 1925 Serum Run from Nenana to Nome. In many places the trail follows those established and used by Alaska Native peoples. Today, the Iditarod National Historic Trail is widely known for its winter recreation, and its use in the Iditarod Trail Sled Dog Race, held annually in March. blm.gov.
